

QUESTBANK: COLLEGE QUESTION PAPER & AI STUDY HUB

I am going to explore the project directory to understand its structure, main files, and functionality, so I can provide a comprehensive overview (Introduction, Abstract, Tech & Tools, Modules, Features, and Workflow).

Listed directory study%20exam%20vault

I am going to check the `README.md` file to see if there is any existing documentation for this project.

Viewed README.md:1-137

I will list the files in the `routes` directory to verify the backend routes and identify all modules.

Listed directory routes

I will view `models.py` to check the database schema, models, roles, and relationships to get a clear picture of the project's features and architecture.

Viewed models.py:1-250

I will view the rest of the `models.py` file to see all defined models like badges, study plans, annotations, mock attempts, etc.

Viewed models.py:251-466

I will view `app.py` to see the setup of the Flask application, blueprints, configure extensions, etc.

Viewed app.py:1-96

I will view the beginning of `routes/main.py` to understand the public routes, search capability, and core API endpoints.

Viewed main.py:1-100

I will run a quick search inside `routes/main.py` to see what route endpoints are defined.

Searched for "@main_bp.route"

I will search for `main\_bp` in `routes/main.py` to see the structure of route handlers.

Searched for "main_bp.route"

I will view lines 101 to 200 of `routes/main.py` to see the next set of routes.

Viewed main.py:101-200

I will view lines 201 to 300 of `routes/main.py` to see the AI assistant's details.

Viewed main.py:201-300

I will view lines 301 to 400 of `routes/main.py` to examine the rest of the AI study assistant, the API routes, and how they handle request processing.

Viewed main.py:301-400

I will view lines 401 to 500 of `routes/main.py` to check the remaining API endpoints.

Viewed main.py:401-500

I will view the rest of `routes/main.py` from line 501 to 654.

Viewed main.py:501-654

I will view `routes/moderator.py` to examine the Moderator role endpoints and capabilities.

Viewed moderator.py:1-191
